

MSHS/MEG Press Release – 2014-07-24

### **MSHS Joins Forces with Metalock Engineering Germany GmbH, to offer Mobile Machining to Marine and Power Generation Applications**

Motor-Services Hugo Stamp, Inc. (MSHS) is proud to announce the signing of a service agreement with Metalock Engineering Germany GmbH (Metalock).

MSHS, a turn-key supplier of engine and auxiliary systems service, parts and overhauls, will partner with Metalock to offer mobile machining to power plant, marine and industrial applications within North, Central and South America, and the Caribbean.

Metalock is one of the few mobile machining experts in the world and is renowned globally for the quality of its work. The agreement provides MSHS with Metalock's expertise and special tooling so that MSHS can offer this service to its customers, in addition to their already comprehensive engine and overhaul services.

Mobile machining provides customers with in-situ repairs which require grinding, machining or boring due to emergency situations, or the machinery being too large or too heavy to be shipped to a machine shop.

Are Friesecke, President of the MSHS Group, stated, "The addition of mobile machining to MSHS offering provides a significant step forward in ensuring we can support our customers in whatever circumstances they need us; we're excited to be able to partner with Metalock Engineering, GmbH, a world leader in mobile machining."

Fritz-Peter Ecken, Managing Director of Metalock Engineering Germany, stated: "This co-operation represents an important step towards a continuing internationalization of the business activities. We are convinced that we have initiated a successful, future-oriented co-operation for both companies."

#### **About Motor-Services Hugo Stamp, Inc.**

Founded in 1983, MSHS provides turnkey solutions for the maritime and stationary power industries. Pursuit of engineering excellence and commitment to customer service has enabled MSHS to establish relationships with customers worldwide.

MSHS continually meets customers' requirements through the rapid delivery of solutions, and competitive pricing. MSHS has dynamically established a strategy for continuous reinvestment in resources and infrastructure. This constant drive for modernization has enabled the company to maintain consistent competitive advantages in the maritime industry.

#### **About Metalock Engineering GmbH**

Since 1952, Metalock Engineering Germany GmbH has been active in the fields of mechanical machining, welding, MTALOCK/MASTERLOCK repairs and overhauling production machines used both in industry, offshore and in shipping. With around 210 employees, Metalock Engineering Germany GmbH is the largest company in the MIDROC Metalock Group; being part of this Group provides cooperation with network of experts worldwide.

Metalock Engineering Germany GmbH operates internationally from its headquarters near Hamburg, Germany, and is supported by branches throughout Germany. Metalock Engineering Germany GmbH develops machines in-house which are continually optimized for exclusive use of Metalock applications.
